

FCA in support of Italy's earthquake-hit territories

FCA, FCA Bank and Leasys give concrete expression of their solidarity and their closeness to the communities affected by the earthquakes which have hit Central Italy.

In order to provide support for people who have been struck by this disaster, FCA is participating in fund-raising activities carried out by the Italian Red Cross, which is in the front line of emergency assistance operations. The FCA Group is committed to integrating the sums of money donated by its employees to this humanitarian initiative.

As well as this, the Group is making a fleet of vehicles available to institutions involved in emergency operations in the areas affected. These consist of commercial vehicles vital for logistical and operative needs.

Among the numerous company initiatives launched is the suspension of payment of instalments and fees for contract financing, leasing and hire signed by inhabitants of the areas hit by the earthquakes. On top of this, FCA and FCA Bank are making available a solidarity programme for those in the area whose cars or vehicles have been damaged or destroyed, offering those who wish to purchase a new Group vehicle zero-advance contracts with zero interest for five years, in addition to all other promotional offers.

And finally, Mopar, the FCA brand for services, Customer Care, original spare parts and accessories for FCA brands, offers all residents of the affected areas a reduction on spare parts used to repair vehicles damaged by the earthquakes, up to a cost of €1500.

These company initiatives confirm its commitment, in terms of humanitarian, technical and economic aid to the population struck by this tragedy.

Call the Group's toll-free "green" telephone numbers in order to contact the call center in order to obtain further information.
