

Ned CURIC
Chief Engineering and
Technology Officer

Ned Curic is Chief Engineering and Technology Officer with responsibility for Product Development and Technology. He also serves on the Interim Executive Committee, which is responsible for the direction and oversight of Stellantis.

From June 2017, he was Vice President, Alexa Automotive at Amazon spearheading Amazon's efforts in the Automotive industry.

Curic started his career in 1996 in the field of Engineering Systems at Northrop Grumman, an American multinational aerospace and defense technology company.

After a short stint in the financial industry, in 2000 he joined Microsoft where he held various roles in Consulting, Product, Security and Advisory.

He entered the automotive sector in 2013, as Group Vice President & Chief Technology Officer at Toyota Motor North America and, in 2015, became Co-founder and Executive Vice-President, Technical Director and Board Member at Toyota Connected.

Curic studied Informatics and Computer Science, and received a Master's in Business Administration from Pepperdine University's George L. Graziadio School of Business and Management in 2012.
