

Patrice LUCAS

Deputy Chief Engineering
Officer
Cross Car Line and Project Engineering

Patrice Lucas was appointed Deputy Chief Engineering Officer for Cross Car Line and Project Engineering and a member of Stellantis' Top Executive Team in January 2021.

He has built his entire career within the automotive industry for the last 30 years, 15 years at Tier 1 Automotive Supplier, Valeo and 15 years at OEM within Groupe PSA.

He joined VALEO in 1991 starting as Quality Engineer and successively holding different responsibilities, in Engineering, then as a Plant Director in Mexico and then as General Manager of a European division / Business Unit responsible for the entire business from engineering to manufacturing and sales.

In 2006, he joined Groupe PSA as SVP in the engineering organization in charge of the vehicle interior developments. Then, he was appointed in 2010 as Program Director for the LCV business in charge of the programs renewing the product range and of Life Cycle Management.

In 2014, he became EVP and member of Groupe PSA's Global Executive Committee in charge of Corporate Planning, Programs and Strategy. He was in charge of leading the strategic plans, optimizing the R&D and CAPEX allocations aligned with the Product Plan offensive, and of all the business development matters, including the Opel acquisition.

From 2018, he was in charge of the Groupe PSA operations in LATAM.

Patrice Lucas received a Mechanical Engineering Degree at UTC (Université de Technologie de Compiègne), including 1 year at University of Illinois. He completed his Master Degree in Quality Management at ENSAM Paris.
