Report of Independent Auditors

The Board of Directors Fiat Chrysler Finance North America, Inc.

We have audited the accompanying financial statements of Fiat Chrysler Finance North America, Inc. (a wholly owned subsidiary of Fiat Chrysler Finance Europe S.A. whose ultimate parent is Fiat Chrysler Automobiles N.V.) which comprise the statements of financial position as of December 31, 2016 and 2015, and the related statements of income, comprehensive income, changes in stockholders' equity and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Fiat Chrysler Finance North America, Inc. at December 31, 2016 and 2015, and the results of its operations and its cash flows for the years then ended in conformity with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board.

> Notes to Financial Statements (*Expressed in U.S. Dollars in Thousands*)

> > December 31, 2016

1. Business Description and Organization

Fiat Chrysler Finance North America, Inc. (the "Company"), a wholly owned subsidiary of Fiat Chrysler Finance Europe, S.A., was incorporated on August 5, 1996, and began operations on September 15, 1996. The Company is ultimately controlled by Fiat Chrysler Automobiles N.V. ("FCA NV," formerly known as Fiat S.p.A.), incorporated in the Netherlands. The Company's principal place of business is located at 1000 Chrysler Drive, Auburn Hills, Michigan 48326. The Company performs cash management, investment and corporate finance services and working capital financing for all FCA companies in the North American region. On March 17, 2017, the Board of Directors authorized the issuance of the Company's financial statements.

2. Basis of Accounting and Summary of Significant Accounting Policies

Basis of Presentation

The Company's financial statements are prepared in conformity with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"). The Company's financial statements consist of the Statements of Financial Position, Statements of Income, Statements of Comprehensive Income, Statements of Changes in Stockholder's Equity and Statements of Cash Flows, with related notes. The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. These estimates relate mainly to the fair value of financial derivatives and notes payable.

Reclassifications

Certain prior year amounts have been reclassified to conform to the current year presentation.

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

2. Basis of Accounting and Summary of Significant Accounting Policies (continued)

Foreign Currency

The accounting records of the Company are maintained in US dollars ("USD"), which represents the main functional currency of the Company; the financial statements are prepared in this currency. Assets and liabilities denominated in currencies other than USD are converted into USD at the exchange rates prevailing at the balance sheet date. Foreign currency exchange gains and losses arising from fluctuations in currency exchange rates on transactions and the effects of remeasurement of monetary balances denominated in currencies other than the functional currency are recorded in earnings as incurred and are included in Net result on hedging and trading activity in the accompanying Statements of Income.

Financial Instruments

For initial recognition of standardized purchases and sales of financial assets (contracts requiring delivery of an asset within a period of time determined by market regulation or convention), the Company uses the settlement date accounting.

The classification of financial instruments at initial recognition depends on their purpose and characteristics and the management's intention in acquiring them. All financial instruments are measured initially at fair value plus transaction costs.

Amounts owed by affiliated companies where they have a fixed term are measured at amortized cost using the effective interest rate method. Assets that do not have a fixed term are measured at cost. As an exception to the above policy, amortized cost is not used for short term current assets and liabilities (including cash and cash equivalents), given the immateriality of the impact of the effective interest rate method.

Borrowings are initially recognized at fair value adjusted for any income and expense directly attributable to the liability. Fair value of borrowings is normally equivalent to the total funds received. With the exception of on demand and short-term borrowings, subsequent measurement is at amortized cost using the effective interest rate method.

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

2. Basis of Accounting and Summary of Significant Accounting Policies (continued)

Derivative Financial Instruments

Derivative financial instruments used to manage currency and interest rate risks arising from the Company's financial assets and liabilities are recorded at fair value. The Company follows International Accounting Standards ("IS") 39, *Financial Instruments: Recognition and Measurement*, which provides that all derivative instruments should be recognized as either assets or liabilities depending on the rights and obligations under the contract and that all derivative instruments be measured at fair value. Fair value is defined as the amounts for which an asset could be exchanged, or liability settled between knowledgeable, willing parties in an arm's length transaction. For fair value hedges, in which derivatives hedge the fair value of assets and liabilities, changes in the fair value of derivatives will be reflected in current earnings, together with changes in the fair value of the related hedged item with referenced to the hedged risk.

The fair value hedges in which the Company engages includes hedges of medium-term loans to affiliates and notes issued. On these fair value hedges, the Company specifically hedges interestrate and/or currency risk. These hedges have been deemed highly effective. For cash flow hedges, in which derivatives hedge the variability of cash flows related to floating-rate assets, liabilities, or forecasted transactions, the accounting treatment will depend on the effectiveness of the hedge. To the extent these derivatives are effective in offsetting the variability of the hedged cash flow, changes in the derivatives' fair value will not be included in current earnings but will be reported as cash flow hedge reserve (net of tax) in the statement of changes in stockholder's equity. These changes in fair value will be included in earnings of future periods when earnings are also affected by the variability of the hedged cash flows. On these cash flow hedges, the Company currently hedges the change in the dollar value of bond flows due to change in foreign exchange rates. These hedges have been deemed highly effective. The Company from time to time may enter into derivative contracts that do not meet the criteria for hedge accounting; therefore, even though these contracts are substantially hedging exchange rate risks, these are considered trading. Realized and unrealized foreign exchange gains and losses in the trading derivative's fair value, as well as the interest accruals associated with the trading derivatives are reported in net result on the hedging and trading activities.

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

2. Basis of Accounting and Summary of Significant Accounting Policies (continued)

Fair Value Measurements

The Company follows the provisions of IFRS 13, *Fair Value Measurement*, which clarifies the determination of fair value for the purpose of the financial statements and is applicable to all IFRSs permitting or requiring a fair value measurement or the presentation of disclosures based on fair value.

IFRS 7 requires financial instruments in the statement of financial position at fair value to be classified on the basis of a hierarchy that reflects the significance of the inputs used in determining fair value.

The fair value of financial instruments is determined by taking into consideration market parameters at the balance sheet date and using valuation techniques widely accepted in the financial business environment that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

IFRS 13 requires all assets and liabilities for which fair value is measured or disclosed in the financial statements to be categorized within the fair value hierarchy, described as follows, based on the lowest level of input that is significant to the fair value measurement as a whole:

Level 1 – Unadjusted quoted prices in the active market for identical assets or liabilities:

Level 2 – Inputs other than quoted prices, included within Level 1, that are observable for the asset or the liability either directly (i.e., prices) or indirectly (i.e., derived from prices);

Level 3 – Inputs for the assets or liability that are not based on observable market data (unobservable inputs).

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

2. Basis of Accounting and Summary of Significant Accounting Policies (continued)

| Financial Instrument | Fair Value Method |
|--------------------------------------|--|
| Amounts owed by affiliated companies | Carrying value for short term and variable interest instruments. Discounted cash flows for long term, fixed and variable interest instruments. |
| Bank borrowings | Carrying value for short term and variable interest instruments. Discounted cash flows for long term, fixed and variable interest instruments. |
| Borrowings from affiliated companies | Carrying value for short term and variable interest instruments. Discounted cash flows for long term, fixed and variable interest instruments. |
| Notes payable | Market prices (if available) or discounted cash flow for long term financial instruments. |
| Financial Instrument | Fair Value Method |
| Interest rate swaps | Discounted cash flow of expected interest streams. |
| Cross currency swaps | Discounted cash flow of interest and principal streams. |
| Forward foreign exchange swaps | Forward exchange rate estimated on the basis of the prevailing exchange rate and interest rates in the two currencies at the balance sheet date. |

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

2. Basis of Accounting and Summary of Significant Accounting Policies (continued)

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics, and the risks of asset or liability and the level of fair value hierarchy as above.

In 2016 and 2015, there were no transfers among the levels of fair value.

Income Taxes

The Company follows the provisions of IAS 12 (Revised), *Income Taxes*, which requires the recognition of deferred tax assets and liabilities attributable to temporary differences as determined using the asset and liability method. Current taxes represent a prudent estimate of tax rate to taxable income, which is pre-tax profit adjusted in accordance with the tax regulations governing the taxability/deductibility of income and expenses. Income taxes are recognized in the statement of income, except where they relate to items charged or credited directly to equity or other comprehensive income, in which case the tax effect is also recognized in the statement of comprehensive income.

Recent Accounting Pronouncements

In May 2014, the IASB issued IFRS 15 – Revenue from contracts with customers, which requires a company to recognize revenue upon transfer of control of goods or services to a customer at an amount that reflects the consideration it expects to receive. This new revenue recognition model defines a five step process to achieve this objective. The updated guidance also requires additional disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts. On September 11, 2015, the IASB issued an amendment to this standard, formalizing the deferral of the effective date for periods beginning January 1, 2018. In April 2016, the IASB issued further amendments to the standard, which do not change the underlying principles of the standard, but clarify how those principles should be applied. The amendments clarify how to identify a performance obligation in a contract, determine whether a company is a principal or an agent, determine whether the revenue from granting a license should be recognized

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

2. Basis of Accounting and Summary of Significant Accounting Policies (continued)

at a point in time or over time and provide two additional reliefs to reduce cost and complexity. The amendments are effective from January 1, 2018, which is the same effective date as IFRS 15. We do not expect a material impact to our Financial Statements or disclosures upon adoption of the standard in 2018.

We have implemented all new accounting pronouncements that are in effect. These pronouncements did not have any material impact on the financial statements unless otherwise disclosed, and we do not believe there are any other new accounting pronouncements that have been issued that might have a material impact on our financial position or results of operations.

3. Cash and Cash Equivalents

Cash and cash equivalents are highly liquid investments that are readily convertible to known amounts of cash, and which are subject to an insignificant risk of change in value due to interest rate, quoted price, or penalty on withdrawal. Amounts on deposit, available upon demand, or negotiated to provide for daily liquidity without penalty, are classified as cash and cash equivalents. Time deposits and current accounts and money market accounts that meet the above criteria are reported at par value on our balance sheet, which also represents the fair value. In 2016 the full amount of \$202,577 in cash and cash equivalents related to current account balances held with primary financial institutions. In 2015, \$206,134 in cash and cash equivalents was comprised of \$95,000 related to term deposits and \$111,134 related to current account balances, both held with primary financial institutions.

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

4. Financial Derivatives

Financial derivatives consist of interest rate swap, cross currency swap and forward foreign exchange swap agreements entered into by the Company in order to hedge exposure to interest rate and cross currency movements, in connection with (i) fixed rate lending to affiliates funded by floating-rate liabilities, (ii) notes issued in currencies other than USD or bearing interest at a fixed rate and (iii) lending to affiliates in currencies other than USD. Specific policy guidelines are established to ensure that asset and liability interest rate and currency positions are matched. Therefore, the Company believes that fair value of the derivative financial instruments at year-end was or will be offset by similar and opposite unrealized gains and losses on its existing short or medium term loans to affiliates and on the notes issued. The following indicates the type of swaps and hedges used and their fair values. These swap contracts will mature within one year. The swaps primarily hedge the risks on the notes payable, in some cases the risk is hedged by more than one derivative simultaneously.

| | Nominal Amount | Fair Value |
|--|-----------------------|------------------------|
| December 31, 2016 | Amount | Value |
| Fair value hedge: | ф сол 1 сл | ¢ 01 500 |
| Interest rate swaps Cross currency swaps | \$ 685,165 453,045 | \$ 31,590 (120,823) |

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

4. **Financial Derivatives (continued)**

The amount recorded in the cash flow hedge reserve for a total of \$(1.1) million and \$(3.1) million (net of tax) as of December 31, 2016 and 2015, respectively, is expected to be reversed according to the duration of the underlying notes payable (final maturity 2017). With reference to the above cash flow hedge reserve, deferred tax assets of \$0.8 million and \$2.7 million have been recognized directly in equity in the cash flow hedge reserve as of December 31, 2106 and 2015, respectively. In 2016 and 2015, the ineffectiveness of cash flow hedges, recognized in Net Result on Hedging and Trading Activities in the accompanying Statements of Income, was immaterial.

For the years ended December 31, 2016 and 2015, losses of \$3.0 million and \$3.0 million, respectively, were recognized in the statement of income in net result on hedging activities related to the discontinuation of cash flow hedges.

For fair value hedges, the gains and losses arising from the valuation of interest rate and cross currency swaps and interest rate swaps to be recognized in accordance with fair value hedge accounting and the gains and losses arising from the respective hedged items are set out in the following table:

| | Ye | ears Ended | Dec | ember 31, |
|--|----|------------|-----|-----------|
| | | 2016 | | 2015 |
| Currency risk: | | | | |
| Net losses on qualifying hedges | \$ | (14,871) | \$ | (53,896) |
| Fair value changes in hedged items (notes payable) | | 14,871 | | 53,896 |
| Net gains (losses) | \$ | - | \$ | - |
| Interest rate risk: | | | | |
| Net losses on qualifying hedges | \$ | (31,766) | \$ | (34,261) |
| Fair value changes in hedged items | | 31,587 | | 34,433 |
| Net gains (losses) | \$ | (179) | \$ | 172 |

For the years ended December 31, 2016 and 2015, a gain of \$15 million and a gain of \$14 million was recognized in Net Result on Hedging and Trading Activities in the accompanying Statements of Income related to the discontinuation of fair value hedges, respectively.

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

4. Financial Derivatives (continued)

As of December 31, 2016 and 2015, the ineffectiveness arising from transactions treated as fair value hedges referring to the hedging relationships related to the notes payable was a loss of \$179 thousand and a gain of \$172 thousand, respectively. The ineffectiveness arising from fair value hedges related to fixed rate lending to affiliates was not material. The net result of gains and losses on hedging and trading activities was a loss of \$5.7 million and a loss of \$1.4 million in 2016 and 2015, respectively. Net results from just unrealized trading activities were a loss of \$(35.1) million and a loss of \$(21.5) million in December 31, 2016 and 2015, respectively.

5. Property, Plant, and Equipment

All property, plant, and equipment was disposed of during 2016. The lease agreement for office space in New York expired on July 31, 2016, and no fixed assets were kept when the Company's operations were moved to Auburn Hills, Michigan.

The changes in 2016 and 2015 of property, plant, and equipment are represented below:

| | Year | s Ended 1 | Dec | ember 31, |
|--------------------------|------|-----------|-----|-----------|
| | 2 | 016 | | 2015 |
| Beginning balance | \$ | 50 | \$ | 61 |
| Additions | | - | | 16 |
| Disposals | | (41) | | - |
| Depreciation | | (9) | | (27) |
| Ending balance | \$ | - | \$ | 50 |
| | | | | |
| Gross carrying amount | | - | \$ | 276 |

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

6. Bank Borrowings

The Company had bank borrowings based on various benchmark rates plus a spread. As of December 31, 2016 the Company had no borrowings against its available lines of credit. As of December 31, 2015, the Company had drawn \$45 million, on its available lines of credit. At December 31, 2016 and 2015, the Company had \$100 million and \$150 million, respectively, in unutilized lines of credit available. Information on the expiration dates of such borrowings are presented in Note 10 *Information on Financial Risks* below. Interest expenses are recorded on the accrual basis of accounting.

7. Notes Payable

The Company participates as an issuer in a EUR 20 billion Global Medium-Term Notes Program, together with Fiat Chrysler Finance Canada, Ltd., Fiat Chrysler Finance Europe S.A., and Fiat Chrysler Automobiles N.V. The notes are unconditionally and irrevocably guaranteed by the ultimate Parent Company (Fiat Chrysler Automobiles N.V.). As of December 31, 2016 and 2015, the Company had one note outstanding with a notional value of EUR 1 billion bearing an interest rate of 5.625% which matures on June 12, 2017. As the note is issued in a currency other than US Dollars and with a fixed interest rate, the Company entered into cross currency and interest rate swaps in order to hedge such exposure (see Note 4).

8. Commitments and Contingencies

The Company had outstanding standby letters of credit issued on behalf of affiliated companies of \$2.05 million and \$10.6 million at December 31, 2016 and 2015, respectively. These contract amounts represent the amounts at risk should the contracts be fully drawn upon and the affiliate defaults.

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

9. Estimated Fair Value of Financial Instruments (continued)

Due to the management judgment required in interpreting market information, the estimates presented above approximate the amounts that the Company could realize in a current market transaction.

In applying discounted cash flow techniques, a discount rate commensurate with market conditions at December 31, 2016, the relevant currency and the risk of the underlying instrument were all used. In all cases, fair values were translated into USD using the exchange rates ruling at the balance sheet date.

The estimated fair value of both amounts owed by affiliates and borrowings from affiliates reflects the "spreads" at which the debt was traded on the market at year-end.

10. Information on Financial Risks

The Company is exposed to various financial risks in the course of its operations. The Company regularly monitors and manages its exposure in a conservative and prudent manner, as required by the Fiat Chrysler Automobiles Group's ("FCA Group") financial risk management policy.

The quantitative data reported in the following does not have any value of a prospective nature, in particular the sensitivity analysis on market risks. The Company is unable to reflect the complexity of the market and its related reaction which may result from every change which may occur.

Credit Risk – The credit risk of the Company is represented by loans granted to affiliated companies and by the investments of excess cash in the market.

Management believes the credit risk to be extremely low. The majority of the assets consist of loans to affiliated companies and cash and cash equivalents.

Market investments are made according to strict regulations and policies which define minimum counterparty rating requirements and limits to amounts invested in single counterparties in order to avoid concentration of risk.

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

10. Information on Financial Risks (continued)

Loans to affiliated companies are granted at arms' length rates and their terms are regulated by standard Intercompany Agreements. None of the outstanding loans to affiliates as of December 31, 2016 and 2015, were delinquent or written off.

Exchange Rate Risk – The notes payable and specific loan receivables from an affiliated party are denominated in a currency other than USD and as a result, the Company is exposed to risk resulting from changes in the currency exchange rate versus USD. It is the Company's policy to use derivative financial instruments to fully hedge its exchange rate risk exposure.

Sensitivity Analysis

The potential loss in fair value of derivative financial instruments held by the Company at December 31, 2016 and 2015, for managing exchange rate risk, which would arise in the case of a hypothetical, unfavorable and instantaneous change of 10% in the exchange rates, amounts to approximately \$121 million and \$97 million, respectively. These amounts will be potentially offset by the change of the underlying instruments (mainly the notes payable).

Liquidity Risk – The table below summarizes the maturity profile of the undiscounted cash flows of the Company's financial assets and liabilities as at December 31, 2016 and December 31, 2015, respectively. Liquidity risk arises if the Company is unable to obtain under acceptable economic conditions the funds needed to carry out its operations. The Company's liquidity position for December 31, 2016 and December 31, 2015 is as follows (in carrying value):

| | On Demand | | Less Than 3 Months | | 3 to 12 Months | | 1 to 5 Years | | Over 5 Years | | | Total |
|--------------------------------------|--------------|-----------|-----------------------|----|-------------------|----|-----------------|---|-----------------|---|----|-----------|

| December 31, 2015 Financial Guarantees | \$ | - | \$ | 4,695 | \$ | 5,892 | \$ | - | \$ | _ | \$ | 10,587 |

Interest Rate Risk – The Company provides fixed rate medium and long term financing to certain affiliated companies. The interest rate profile of our liabilities may not necessarily match that of these specific assets. In order to manage these risks, the Company uses interest rate swaps with the object of mitigating, under economically acceptable conditions, the potential variability of interest rate swaps.

Sensitivity Analysis

In assessing the potential impact of changes in interest rates, the Company separates fixed rate financial instruments (for which the impact is assessed in terms of fair value) from floating rate financial instruments (for which the impact is assessed in terms of cash flows).

The fixed rate financial instruments consist of loans granted to affiliated companies and notes payable.

The potential loss in fair value of fixed rate financial instruments (including the effect of interest rate derivative financial instruments) resulting from a hypothetical, unfavorable and instantaneous change of 10% in market interest rates, would have resulted in income of \$1.1 million for the year ended December 31, 2015. The impact for the year ended December 31, 2016 would have been immaterial. The decrease of the impact is due to the fixed rate debt maturing within the year.

Floating rate financial instruments mainly include loans granted to affiliated companies.

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

10. Information on Financial Risks (continued)

A hypothetical, unfavorable and instantaneous change of 10% in short-term interest rates applied to floating rate financial assets and liabilities and derivatives financial instruments, would have resulted in a charge to income of approximately \$1.3 million and \$0.7 million at December 31, 2016 and 2015, respectively.

11. Income Taxes

The components of income tax expense for the years ended December 31, 2016 and 2015 are as follows:

| | Years Ended December 3 | | | | | | | | | |
|--------------------------------|------------------------|---------|------|-------|--|--|--|--|--|--|
| | | 2016 | 2015 | | | | | | | |
| Current Tax Expense (recovery) | | | | | | | | | | |
| Federal | \$ | 553 | \$ | (29) | | | | | | |
| State and Local | | 302 | | 1,387 | | | | | | |
| Withholding Tax | | 3,419 | | 1,058 | | | | | | |
| Deferred Tax Expense | | (2,870) | | 144 | | | | | | |
| Ending balance | \$ | 1,404 | \$ | 2,560 | | | | | | |

The differences between the theoretical rate and the Company's effective rate are mainly attributable to permanent differences and the results of certain events discussed below. This resulted in a theoretical tax rate of 42.24% and 46.36% as opposed to an effective tax rate of 40.26% and 23.13% at December 31, 2016 and December 31, 2015, respectively. For the year ended December 31, 2016, the difference between the theoretical tax rate and effective tax rate is primarily related to insignificant permanent items. For the year ended December 31, 2015, the decrease in the effective tax rate was the result of the Company claiming certain foreign withholding tax credits during 2015 which had previously not been claimed due to uncertainty over the limitation of the foreign tax credit within the Company's affiliated group.

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

11. Income Taxes (continued)

As a result of differences between book and tax basis, the Company has recorded a deferred tax asset of \$0.8 million and \$2.7 million related to certain derivative contracts and a deferred tax asset of \$3.0 million and \$0.3 million related to other items at December 31, 2016 and December 31, 2015, respectively. Tax effect on income recognized in the cash flow hedge reserve had a positive impact of \$1.5 million and \$2.3 million in 2016 and 2015, respectively.

12. Stockholder's Equity

The share capital of the Company amounts to USD 190,090 represented by 380 shares fully subscribed and paid up with no nominal value. As of December 31, 2016 and 2015, a cash flow hedge reserve of \$(1.1) million and \$(3.1) million (net of tax) was recorded to be released upon the maturing interest portions of the notes payable, respectively. The Company is not subject to any specific constraints on equity within its course of business. Management believes that the capital structure of the Company is fully adequate to its operations.

13. Transactions With Affiliated Parties

Cash management services provided by the Company are funded primarily from the receipt of excess cash from affiliated companies, capital market transactions, and revolving credit lines from third parties; such balances are used for investment and for the financing of the working capital needs of other affiliated companies. Amounts owed by affiliated companies also consist of short term loans maturing within one year. For transactions having a duration of less than or equal to one year it is believed that the carrying value approximates the fair value. For transactions having duration of more than one year they are reported at fair value. They are carried out at arm's length, considering the services rendered.

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

13. Transactions With Affiliated Parties (continued)

The impact on the financial statements of transactions with affiliates appears below:

| | Year Ended December 3 | | | | |
|--|-----------------------|-------------------------------------|----|--------------------------------------|--|
| | | 2016 | | 2015 | |
| Interest income | \$ | 48,338 | \$ | 48,995 | |
| Other financial income | | 98 | | 143 | |
| Other income | | 33 | | 810 | |
| Interest expense | | 2,297 | | 3,056 | |
| Other expenses | | 435 | | 386 | |
| Net result on hedging and trading activities | | 11,305 | | 12,749 | |
| Amounts owed by affiliated companies* Financial derivatives - at positive fair value Amounts owed to affiliated companies* Financial derivatives - at negative fair value | 1 | ,768,178 7,591 522,720 725 | | 1,911,917 2,885 609,607 828 | |
| | | | | 0_0 | |

*Amounts include accrued interest

14. Interest Income and Interest Expense

Interest income is comprised of interest on cash and cash equivalents, loans with affiliated parties and derivatives. Interest expense is comprised of loans with affiliated parties, loans with banks and derivatives.

15. Other Financial Income and Other Financial Expenses

Other financial income is comprised of letter of credit fees. Other financial expenses are comprised of letter of credit fees, commitment fees with banks, and guarantees with affiliated companies.

Notes to Financial Statements (continued) (*Expressed in U.S. Dollars in Thousands*)

16. Other Income

In 2015, other income includes annual fees of \$758 thousand, respectively, charged to CNH Industrial Finance North America, Inc. in exchange for services provided by the Company. Services that were historically provided to CNH Industrial were discontinued at the end of 2015.

17. Subsequent Events

Management has evaluated subsequent events through March 17, 2017, the date these financial statements were available to be issued.
